

**MICHAEL J. OLSEN, Ph.D.** is the College of Engineering Dean's Professor in the School of Civil and Construction Engineering at Oregon State University. He obtained BS and MS degrees in Civil Engineering from the University of Utah and a PhD in Structural Engineering from the University of California, San Diego. At OSU he both teaches and performs research in geomatics topics such as 3D laser scanning and imaging, digital terrain modeling, and geographic information systems. He is the Editor in Chief for the ASCE Journal of Surveying Engineering as well as the President of the Surveying and Geomatics Educators Society (SaGES). He serves as the Technical Director for the NSF Natural Hazards Research Infrastructure (NHERI) RAPID facility, which provides investigators with equipment, software, and support services needed to collect, process, and analyze perishable data from natural hazards events. He is also the Director of the Cascadia Lifelines Program (CLiP), which conducts research that allows Oregon's lifeline providers to implement value- and cost-informed decisions to mitigate damage to Pacific Northwest infrastructure as the result of Cascadia subduction zone earthquakes.
